I also provided design and support for various country club projects in the Mid-Atlantic/North region. Primary responsibilities were design of new FF&E 3D models, space planning, new construction plans and documentation, demolition plans, reflected ceiling plans, elevations, 3D views, and 3D rendering.

My experience at Mindgrub afforded me the opportunity to expand my knowledge in digital design and brand strategy. I worked independently as well as collaboratively with teams of designers, developers, and directors.
